Wheat Stabilization Program

Friday, December 14, is the last day for farmers to sign under the special voluntary 1963 wheat proyram.

In Appomattox County through December 7 shows a total of 227 wheat - producing farms signed up to divert 1469 wheat acres to conserving uses, according to J. A. Martin, Chairman, Agricultural Stabilization and Conservation County Committee.

There has been some pickup in the rate of signup in recent weeks," the chairman states, "and it would be unfortunate if operators of wheat farms who really want to participate in the wheat stabilization program were unable to because they let the signup period slip by without filing an application."

Under the program, farmers who reduce wheat acreage by 20 to 30 percent, will earn income - maintaining payments equal to 50 percent of the county loan rate (reflecting the $1.82 national average) on the normal production of the diverted wheat acreage. Special provisions apply to small farms.

Participating farmers will be eligible for wheat price - support loans or purchase agreements at a national average of $1.82 per bushel. In addition, they will receive a price - support payment of 16 cents per bushel on the normal production of the farm's 1963 wheat acreage.

Farmers who participate in the wheat program must divert all of the acreage signed up in order to be eligible for price support or for acreage diversion or price-support payments, Mr. Martin explained.

The Minister Speaks

Light for the Darkness Isaiah 9:2

One night, as a lad, I was awakened by a great light. My room was flooded with what seemed to be mid-day. The clock showed it was only 1 a.m. Not being accustomed to such things my first thought was that this must be the "end of time". When my dad told me later that this was the Great Northern Lights, caused by the reflection of the sun on ice in the Northern Regions, great relief came over me.

When the great prophet Isaiah said to Israel, 600 years before the first Christmas Season, that though they were in darkness" they have seen a great light", he announced a great truth related to this Season.

For a great light has come—we have "a Saviour, a Counselor, A Mighty God, An Everlasting Father, the Prince of Peace, and of the increase of His Government and Peace there shall be no end." (Isaiah 9:6-9)

In a dark world, where the gods of materialism and secularism on eclipsed the light again, almost as bad as Israel experienced in her captivities, we have courage to look up—for a great light is here. No amount of darkness can put out the great light of God's purpose. Not even all the darkness of the world can put out the light of the smallest candle. No amount of selfishness and godless idolatry, as exposed by many in our world, can extinguish God's purpose in Christ. His coming in human form has brought a light where all can see and experience the benefits of it.

The lights may be some out all over the world, as stated by one leader of the past decade. But they are also coming on again all over the world.

The "light is here — God is with us. His people can turn the lights on again, and we are I believe. As the people of Bath, Australia, turned on their lights for Col. Glenn in a recent orbital flight, many will be turning them on this Christmas season. They will be showing the people of this age the light of love and sacrifice, as they let this light shine in their hearts, and community — keep Christ in Christmas —keep the light shining.
